DETAILED ACTION

Allowable Subject Matter

1. Claims 1 – 10 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art [Hara (JP 6-19525 and 63-124050)] disclose the magazine having the slot with roll-form image recording material, cloth material and a resilient plate mounted as claimed. The prior art does not disclose the particular material PP claimed nor does the reference disclose using embossing. Other references, see PTO form 892, teach that texturing a surface, including embossing, reduces adherence of a material to a surface. Using embossing with the resilient material of the prior art would not have solved the problem because the applicant shows in Table I of the present invention that the PET material is not satisfactory even when it is embossed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited disclose that texturing, such as using ridges, embossing, etc. will help prevent a material from adhering to a surface.
